**SYMPOSIUM ON INNOVATIVE CONCEPTS**  
**FOR TREATING NEURODEGENERATIVE DISEASES**

**Turin, Italy, 23 & 24 September 2015**

NEURINOX, a research consortium funded by the European Commission, investigates mechanisms of neurodegenerative diseases, particularly the contribution of inflammation and reactive oxygen species.

On 23 & 24 September, NEURINOX holds a Symposium on mechanisms and novel treatment concepts in neurodegeneration, with a focus on ALS, epilepsy and multiple sclerosis.

- Day 1 addresses the interested public: patients associations / students / journalists.  
Will be focused on the 3 diseases.
- Day 2 is devoted to the scientific and industrial communities.  
Will be structured around 3 axes:
  - Disease pathophysiology,
  - Biomarker discovery and personalized medicine,
  - Development of new therapies.
